

Google Scholar

Google scholar indexes scholarly materials and searches across all ONU databases.

Navigation

Step 1: Go to the library website using the web address, library.olivet.edu

Step 2: Click the *Journals & Articles* tab.

Step 3: Click Google Scholar.

Journals & Articles

Subject Guides @

Find recommended resources according to your major or subject area.

eResources A-Z @

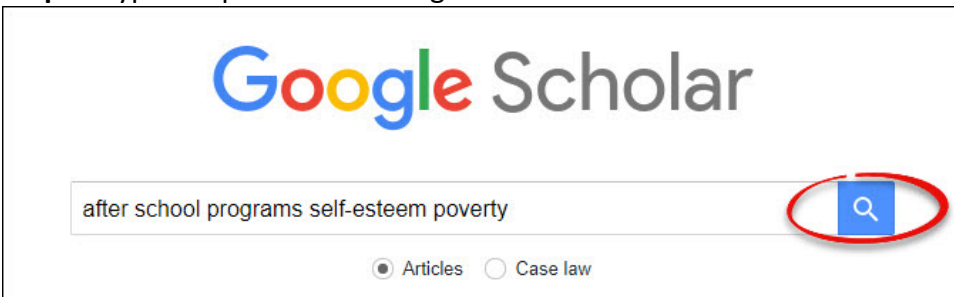

See an alphabetized list of our major eresources.

Google Scholar @

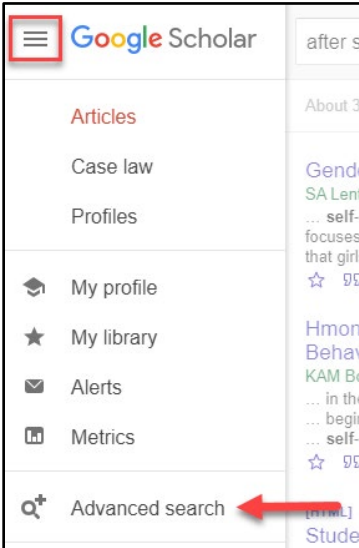

Using Google Scholar

Step 1: Type a topic into the Google Scholar search bar. Click the search button.

Note: Searches with a great number of results will need to be refined.

Step 2: Click the “hamburger” menu in the top left of the page, scroll down, and click *Advanced Search*.

Step 3: Add quotations around phrases in the search bar titled *with all the words* to create a Phrase Search.

Advanced search

Find articles

with all of the words

with the exact phrase

with at least one of the words

without the words

where my words occur

anywhere in the article

in the title of the article

Return articles authored by

e.g., "PJ Hayes" or McCarthy

Return articles published in

e.g., J Biol Chem or Nature

Return articles dated between —

e.g., 1996

Step 4: In the third search box titled *with at least one of the words*, add the words “research method study.”

Advanced search

Find articles

with all of the words: "after school" programs poverty

with the exact phrase: self esteem

with at least one of the words: research method study

without the words:

where my words occur: anywhere in the article
 in the title of the article

Return articles authored by: e.g., "PJ Hayes" or McCarthy

Return articles published in: e.g., J Biol Chem or Nature

Return articles dated between: e.g., 1996

Step 5: Limit the date range using the box towards the bottom of the advanced search titled *return articles dated between*.

Advanced search

Find articles

with all of the words: "after school" programs poverty

with the exact phrase: self esteem

with at least one of the words: research method study

without the words:

where my words occur: anywhere in the article
 in the title of the article

Return articles authored by: e.g., "PJ Hayes" or McCarthy

Return articles published in: e.g., J Biol Chem or Nature

Return articles dated between: 2014 — e.g., 1996

Step 6: Click the blue search button in the upper right corner.

Step 7: Scroll through the articles and read it's abstract in order to check for relevancy.

Note: Words like "study," or discussions about participants in the study, indicate the article to be a research report.

Accessing Fulltext

Step 1: Click the link on the right-hand side of any search result to get full text for a specific article.
